

Electronics Line 3000 to Launch New Interactive Remote Management Applications at IFSEC 2009

Petach Tikvah, Israel (April 1, 2009) – Electronics Line 3000 Ltd. (Prime Standard: ELN), a leading global provider of residential security with remote management, launches new interactive remote management applications as part of its advanced iConnect solution. These will be demonstrated at IFSEC 2009 in Birmingham, UK.

The new iConnect remote management applications include personalized location-based services, a dedicated WAP user interface and advanced video capabilities.

iConnect, Electronics Line 3000's flagship solution, offers wireless residential security, safety, connectivity and control with high-end, stylish and contemporary design. iConnect's new WAP user interface allows users to enjoy comprehensive remote management features through the use of any GPRS-enabled mobile phone, while new location-based services offer users complete peace of mind in knowing where their loved ones are at all times. New advanced video capabilities complete iConnect's suite of remote management applications, ensuring users can view into the premises all times.

These new remote management applications are an exciting new addition to iConnect's remote management applications (for both end-users and providers) which utilize the Electronics Line Application Server (ELAS) to offer state-of-the-art, interactive remote management.

Through the ELAS, iConnect users enjoy location-based services, advanced video capabilities as well as WAP and Web user interfaces. Providers benefit from iConnect's ELAS-based comprehensive suite of management applications and diagnostic tools, offering real-time monitoring en masse, mass remote management, maintenance and status check as well as on and off site configurations and remote firmware updates.

The iConnect solution is suitable for partners such as monitoring and installation companies, value-added distributors, property developers and service providers.

The new iConnect WAP user interface, location based services and advanced video capabilities and will be demonstrated at IFSEC 2009, hall 3A stand E5.
