

**Electronics Line 3000 Ltd. - Release of an Announcement  
According to Article 37x of the WpHG  
[the German Securities Trading Act]**

**Break-even in Q3 2009 and continued positive cash flow**

Petach Tikva, Israel (November 5, 2009) – Electronics Line 3000 Ltd. (“EL3K” or “the Company”) (XETRA: ELN), a leading global provider of wireless security with remote management solutions, today announced its financial results for the first nine months and the third quarter of 2009 in U.S. Dollars.

**Financial Highlights**

Revenues for the third quarter of 2009 were \$6.1 million, compared to \$9.1 million for the same quarter of 2008. Revenues for the first nine months of 2009 were \$18.5 million, compared to \$28.6 million for the first nine months of 2008. The decrease in sales compared to 2008 is mainly driven from the planned sales reduction in the U.S. operations and the low exchange rate of the GBP (British Pound Sterling) in relation to the U.S. Dollar.

Net profit for the third quarter of 2009 was \$1,000, compared to a net loss of \$221,000 for the third quarter of 2008. The net loss for the first nine months of 2009 was \$891,000, compared to a net loss of \$717,000 for the first nine months of 2008.

Net cash provided by operating activities for the third quarter of 2009 was \$147,000 compared to \$818,000 provided by operating activities for the third quarter of 2008. Net cash provided by operating activities for the first nine months of 2009 was \$1.4 million, compared to \$2.6 million net cash provided by operating activities for the comparable period of 2008.

In the third quarter of 2009, the Company improved its financial position with a transition to net profit and continued positive cash flow. The Company’s third-quarter sales figures also demonstrate a stable trend that shows promise of improving the Company’s performance in the fourth quarter.

In the first nine months of 2009 the Company acquired several new customers, including customers from Peru, Columbia and Brazil which reflect the Company’s increased sales activities in Latin America.

Additionally, as part of the Company's ongoing European focus, and following its appointment of a European-based VP of sales, ESP (Electronics Line 3000's U.K. subsidiary) acquired new offices in Redditch, U.K., which were officially opened during October. These new premises offer high-quality training facilities, a state-of-the-art demo room, increased storage and freight facilities, and have been custom-built to meet the needs of the Company's European customers.

As described in the Company's Q1 and Q2 2009 reports, Electronics Line 3000's subsidiary in the U.S., Electronics Line U.S.A. ("ELUSA"), entered into an agreement during Q2 2009 with a local U.S.-based service provider to spin out ELUSA's non-core products. This process has been completed according to plan, enabling ELUSA to enhance its market position.

Mr. Amir Hayek, President and CEO commented, "During the global economic slowdown, the Company looked beyond the present, and worked to ensure its future success. We have put into place advanced efficiency measures, eliminated non-core activities and reassessed our operations. Moreover, understanding the importance of maintaining our market position, we continued to invest in research, development and marketing towards introducing new residential solutions to the market. We expect all these measures to positively impact future results."

Mr. Ron Chaimovski, Vice Chairman of the Board added: "The Company capitalized on the impact of these turbulent times to establish a sound base for its future operations. Third-quarter 2009 results, which included the generation of positive cash flow, the reduction of Company debt and the return to break-even net income, demonstrate that we are succeeding in our strategy of improving financial results even in the midst of a global recession".
