Electronics Line 3000 is pleased to announce the release of the latest version of Prime, **Prime 1.06.06, available now.**

Prime 1.06.06 offers all the proven features of this state-of-the-art system as well as several exciting new additions for enhanced functionality and security.

New Features

Compatibility with Electronics Line Round Multifunction Keyfob

Prime 1.06.06 is now compatible with Electronics Line sleek, round multifunction keyfob, EL-2714.

Remote Activation of PGM

Prime 1.06.06 offers remote activation of PGM output features via DTMF, SMS commands, wired and wireless keypads, and through users' keyfobs.

Remote Activation and X10 Home Automation

Prime 1.06.06 now also includes remote activation of X10 Home Automation features via DTMF.

New No Motion Time Frames

Prime 1.06.06 support new values range for 'No Motion' features. The new range starts at 10 minutes and continues in 10 minute increments up to a maximum of 24 hours and then in 24 hours increments to 48 and 72 hours. This offers users enhanced peace of mind in ensuring their loved ones at home are safe.

GSM Signal Strength Monitoring at Preset Intervals

Prime's 1.06.06 GSM signal lost algorithm was enhanced to allow programming preset intervals during which the GSM signal strength will be tested. Intervals can be programmed at 3-256 minutes (0-disabled), enabling greater control over GSM signal strength monitoring. This is particularly useful for locations where GSM signal strength fluctuates, allowing security monitoring services greater supervision over control systems' performance assurance.

Version Compatibility

Module	Compatible version
PSTN	GF106
GSM	GM103
HA	GU102
LCD	IV103
