Electronics Line 3000 is pleased to announce the release of the latest version of iConnect, **iConnect 3.03.13, available now.**

iConnect 3.03.13 offers all the proven features of this state-of-the-art system as well as several exciting new additions for enhanced functionality and security, including **partitions, IP and GSM/GPRS modules and zone reporting options.**

New Features

Partitions

iConnect 3.03.13 includes the option of creating partitions within the system, allowing users to benefit from greater security coverage with one system. Each system can be divided into two partitions.

Partitions features include:

- User codes – new menu entry added to user codes, for partition set.
- Zones – new menu entry added to user codes, for partition set.
- Keyfob – new partition set menu is added, to assign keyfobs to partitions.
- Smartkeys – new partition set menu added.
- In system options – menu 23 added, for programming partitions descriptors.

New Communication Modules

iConnect 3.03.13 now includes support for Ethernet IP communication module as well as for dedicated GSM/GPRS only option without PSTN backup.

Zone Reporting Option

Zone reporting options have been added, enabling the system to report events from particular zones only.
